The tightening of carbon regulation is increasingly affecting the industry and energy sector in Kazakhstan and the world. In July of this year, the European Commission presented a plan to achieve carbon neutrality by 2050, one of the mechanisms of which is the introduction of the European Carbon Boundary Corrective Mechanism (ECBM).

- **This course is intended for:**
- Specialists in the field of ecology.
- Heads of manufacturing enterprises and departments.
- For the interested in the latest management trends in the field of low-carbon development at the Republican and international levels.

Based on the results of the course, you will receive: An international certificate, full access to the course materials. In addition, you will receive private access to discussing emerging issues with speakers after the course.

Duration - 2 days

The course will be held on the ZOOM platform
